General Format of MESC Codes

Shell MESC codes are alphanumeric identifiers designed to encode specific information about equipment or services. Typically, a MESC code consists of a combination of letters and numbers, with each segment representing a particular classification or attribute.

A typical MESC code format may look like:

- Category Code (Letters): Denotes the broad equipment or service category.
- Subcategory Code (Numbers): Specifies the type or function within the broader category.
- Item Serial Number (Optional): Unique identifier for specific items.

For example:

E1234

- E: Equipment category (e.g., Electrical equipment)
- 1234: Specific item within this category

Classification Hierarchy and Coding Logic

Shell's MESC system employs a hierarchical structure, allowing for detailed classification at multiple levels:
